# Why Mums & Dads love Kaspersky Safe Kids

The digital world offers your kids lots of enjoyment and adventure. But just like the real one, it also comes with threats. Kaspersky Safe Kids offers more than standard parental controls, so you can stay connected with your children and keep them safe – without spoiling their fun.

## Child locator & battery tracker

Kids will be kids. Which means they can wander out of your sight, go places they shouldn't or simply stay out too late. With our GPS child locator, you can pinpoint them on an online map, set a safe area for them to stay in and find out instantly if they step beyond it. Plus you can even monitor their battery level, so you don't lose touch.

## Screen time management

From gaming to social networking, there's lots to keep your kids occupied on their devices. But are you worried they're spending too much time staring at a screen? Use our flexible parental controls to manage their screen time by device\* and educate them about balancing their online and real-world adventure. Get detailed reports on the way they use their devices so you can identify areas of concern.

## Internet & app management

The Internet is an endless source of fun, adventure and learning, but it's also full of danger. Now you can make sure your kids have happy online experiences\* without checking up on their every move. Use our tools to block harmful content and apps\*. Plus view reports on their browsing history and get real-time notifications if they try to visit sites you've flagged as potentially risky.

## Safe communication

With kids using smartphones and social networks more than ever, they're more vulnerable to unwanted attention. Our technology allows you to monitor you kids' Facebook activity – including their public posts and changes in the number of friends they have – so you know they're in safe company.

## Real-time alerts & expert advice

You need to know what your kids are up to so you can give them a helping hand. Kaspersky Safe Kids alerts you the moment they try to view inappropriate content, step outside a safe area you've defined and lots more besides. And because you need the right approach to give them long-term support, we provide advice from leading child psychologists – helping you to connect with them on a range of important issues.
